

NORRSKEN

Window Handles

Handle Information

Finish Availability

Norrskén's standard finish for handles is Satin (also known as Satin Chrome or Silver). Other finishes may have longer lead times and/or additional costs. Please check before order that any potential delays are compatible with the time scale of your project.

Handle Compatibility

Norrskén offers a wide range of handles for both inward and outward opening windows. Due to factors such as handle spindle length and factory availability, not every handle and window profile offered by Norrskén are compatible together. Handles and finishes availability might vary from what is shown in this document due to changes and supply issues. You will be informed when picking your handles if this has happened so you can select an alternative handle/finish.
